Work Experience

Freelance Front End Developer - Batteries 911 (Oct 2016 - Present)

As part of front-end team working on design and implementation of web dashboard of the company for services management, using Angular and NodeJS for that.

Full Stack Senior Developer - IAS (Apr 2014 - Oct 2016)

Working on multiple different projects for SURAMERICANA S.A as outsourcing team member, among which are an implementation of a messaging Broker for the evaluation platform using Hystrix as a resilience mechanism to guarantee the delivery of messages between applications. Also taking a lead role in the medical evaluation platform refactoring with a 3 junior developers team using Spring and Angular.

### Java Developer - ADA S.A (Dec 2011 - Apr 2014)

Supporting and developing for taxes platform owned by the company with Java, JSF, Spring and GWT. Product Implantation and Requirements Analysis were under my assignments too.

Research Assistant - SINTELWEB Research Team (Jul 2009 - Dec 2011)
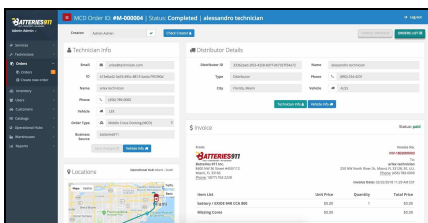

IA/Planning research team based on Mines Faculty of National University of Colombia, Medellín. Participating on multiple research projects as Java developer, write papers and research reports were on my functions too, also I worked as team webmaster during the period that I was part of the research group.
